

# LEASE TRACKER

## IFRS 16 Lease Accounting

Store, manage, report on and account for all your leasing activities

Sage Business Partner

### Automate financial statement disclosures with a comprehensive library of reports

Reports for monthly journals, YTD figures, remeasurements, additions and terminations are all available at multiple group and reporting levels, not to mention IFRS 16 compliant disclosure notes – never prepare a disclosure note again.

### House all your lease information in one central location to simplify your IFRS 16 audit process

Save critical time during audit season by providing your auditors with read-only access to your lease environment at no additional cost.

### Fully supported onboarding and expert advice

Let our team of accounting professionals assist you in transitioning to our lease accounting system whilst providing you with best-practice advice.

### Unlimited user licenses

Non-user-licensed based billing means an unlimited number of users within your organisation can enjoy access to the system.

### The Solution

LeaseTracker offers a user-friendly cloud-based solution that allows you to capture, modify, remeasure and manage all other aspects of your lease contracts within minutes, whilst ensuring compliance with reporting standards.

### Why Choose Us

Founded by a team of dedicated accounting professionals, LeaseTracker, a proud member of the C2 Technologies Group, was designed to provide intelligent accounting solutions through the use of technology.

Whilst we take pride in providing a market-leading product, it is our core principle of exceptional service and our customer-first attitude, which sets us apart.
